In some cases the external signs of Contagious Blood Poison are so slight that the victim is firmly within the grasp of the monster before the true nature of the disease is known. In other cases the blood is quickly filled with this poisonous virus and the swollen glands, mucus patches in the month, sores on scalp, ulcers on tongue, nor throat, eruptions on skin, copper colored splotches, and falling hair and eyebrows.

Doctors still prescribe mercury and potash as the only cure for Blood Poison. These poisonous minerals never yet made a complete and permanent cure of Contagious Blood Poison. They drive the disease back into the system, cover it up for a while, but it breaks out again in worse form. These powerful minerals produce mercurial rheumatism and the most offensive some and ulcers, causing the joints to stiffen and finger mails to drop off. Morecury and potash make wrecks, and cures, and those who have been dosed with these drugs are never after free from aches and pain.

S. S. S. acts in an entirely different manner, being a purely vegetable femedy; it forces the poison out of the system, and instead of tearing down, builds up and invigorates the general health. S. S. S. is to only antidote for this specific virus, and therefore the only cure for Contagious Blood Poison. No matter in what stage or how hopeless the case may appear, even though pronounced incursoble by the doctors, S. S. S. can be relied upon to make a rapid, permanent cure. S. S. S. is not a new, untried remedy; an experience of nearty fifty years has proven it a sure and unfailing cure for this disease. It is the only purely vegetable blood medicine known.

This, I may say, is a common experience with veterinary surgeons. Hundreds of them, after years of active practice, declare that although they may have been called upon to treat dogs for all kinds of allments they have not seen a case of true rables. Take the testimony of Dr. Stackwell, a celebrated authority on deg diseases. He says: "True rables presents multiple and varied phenomena without a single, constant feature; hence its presence is with difficulty determined even by an expert.
